

LET'S TALK AI IN EDUCATION

UNESCO-ICHEI

United Nations
Educational, Scientific and
Cultural Organization
联合国教育科学及文化组织

International Centre
for Higher Education Innovation
under the auspices of UNESCO
联合国教科文组织高等教育创新中心

International Institute
of Online Education
国际网络教育学院

Let's talk AI in Education

- What are the applications of AI in Higher Education?
- How can we use AI to optimise educational resources?
- What are the ethical concerns and how can we deal with them?
- How to build an AI-based Ecosystem to facilitate learning & innovation?

Speaker:

Dr. Wen Zheng
Assistant Professor – Waseda University
School of Fundamental Science and Engineering

Speaker:

Stephane Reinink
Founder of Crescent Apex Business Advisory

Discussant:

Lihui Xu
Associate Programme Specialist,
Social and Human Sciences, UNESCO

Moderator:

Dr. Siyuan Feng
Co-Director of IIOE
Management Centre, UNSEO-ICHEI

🕒 Friday 2 April 2021 19h-20h(GMT+8)

Come join us and explore together!

PART 1

AI & Intelligent Adaptive Learning

Theoretical Framework & Technical Foundations

Teaching Levels of the Intelligent Adaptive Learning (IAL) System

Level 0 – based on Knowledge Hierarchy

E.g.: Khan Academy

Level 1 – based on Basic Principles & Tools

E.g.: Zuoyebang

Level 2 – based on the Item Response Theory (IRT)

E.g.: GRE, ACT

Level 3 – based on Knowledge Network and Statistics

E.g.: ALEKS, Cognitive Tutor, Knewton

Level 4 – based on multi-level Knowledge Graph

E.g.: IBM Watson, Squirrel AI

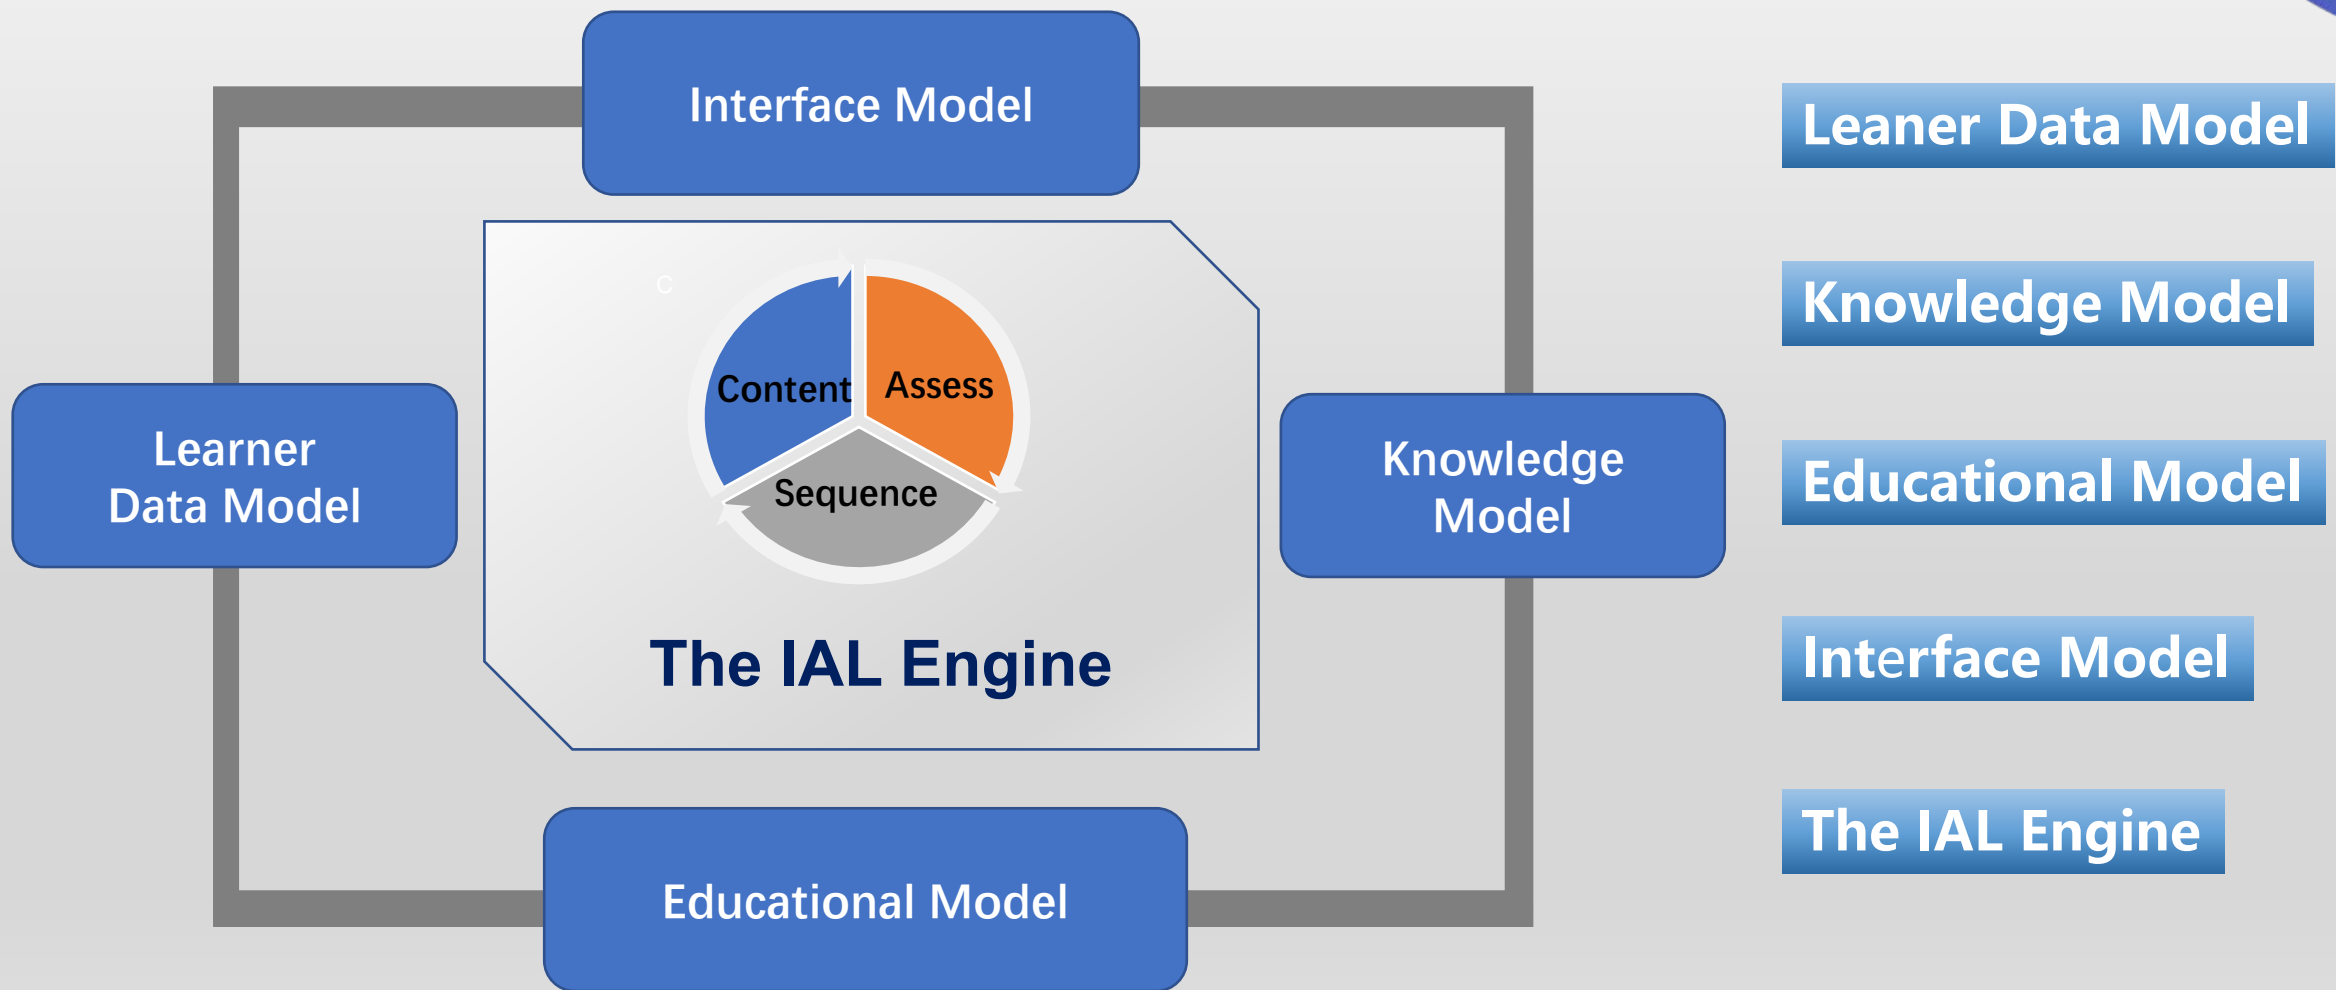

Level 5 – based on Augmented Learning & Genetic Algorithms

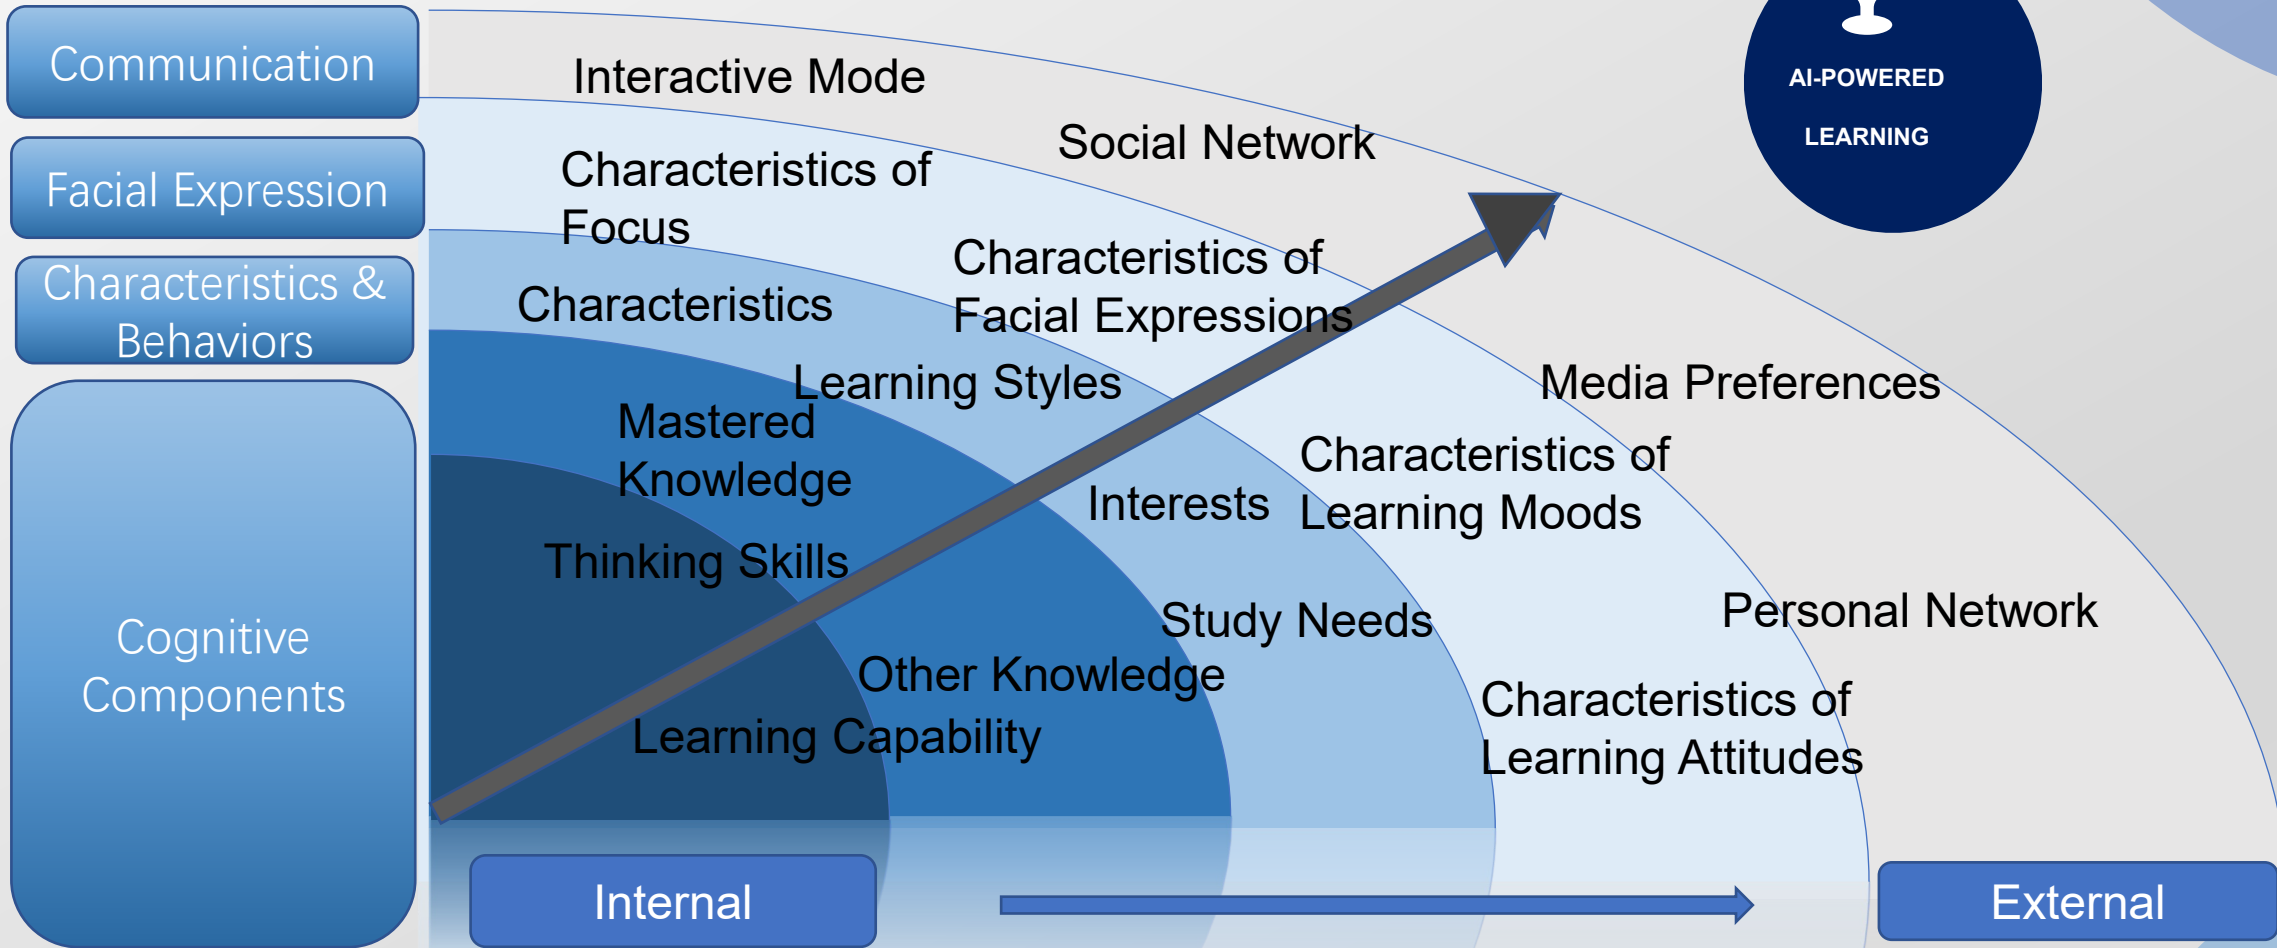

Framework of The Intelligent Adaptive Learning (IAL) Platform

The AI-based 'Learner Data Modeling'

Structure of The IAL Platform

THE LEARNER PLATFORM

EXERCISE

LEARN

Educational Service

Learner Modules

Personal Info Personal Habits
Learning Routes Performance

THE EDUCATION PLATFORM

The Intelligent Adaptive Learning (IAL) Engine

Personalised Recommendation Engine: Anchored Learning Solutions and Materials

Big-data Analytics System: Analyse and Predict Students' Learning Routes

Data Collection and Manipulation: Real-time Data Processing of Students Learning Behaviours

PART 2

Build an AI-powered Higher Education Ecosystem

Future Challenges vs. Opportunities

AI & FUTURE HIGHER EDUCATION

Digital Transformation Worldwide

Transformation

Disruption

Innovation

Excellence

PREPARE FOR THE FUTURE CHALLENGES

Data Collection

Technical Difficulties

Institutional Leadership

External Support

...

Are we prepared for the challenge?..

How can we be better prepared for it?

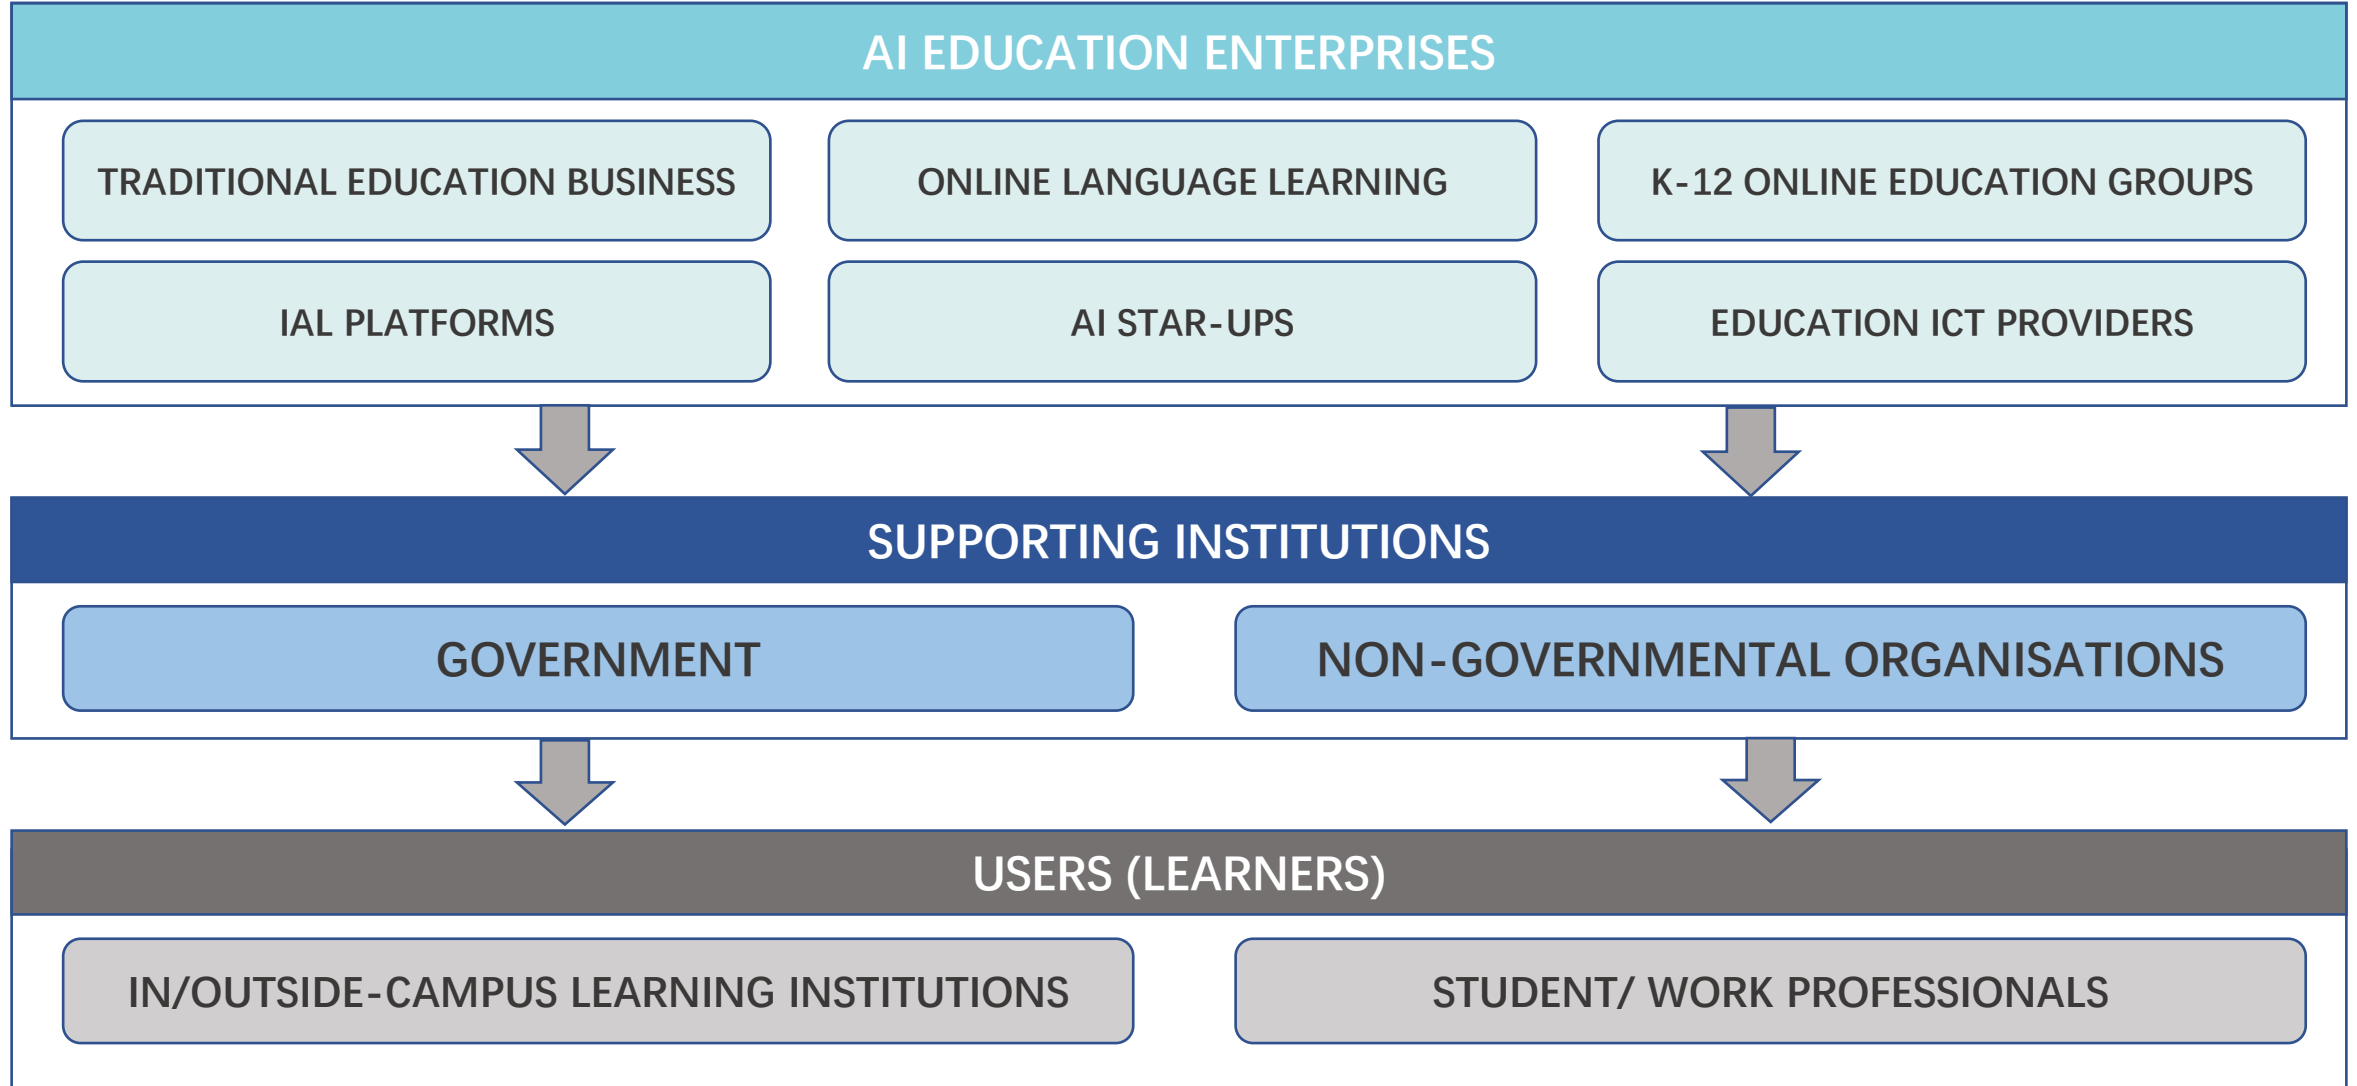

VS

Interact With Technology

Foster Innovation

The AI-powered Education Ecosystem

What Can We Do in Response...

Cope with Challenges & Create Opportunities

Promote **educators** to understand AI in a wide range of professional contexts to establish thorough understandings on 'AI in Higher Education'; enhance teachers' ICT teaching capacity, and empower them to become facilitators who can initiate various Student-centered Learning approaches.

Cultivate Self-directed Learning (SDL) and lifelong learning skills for **Students**, and help them reframe the reflective learning mechanism to learn both individually and collaboratively while many AI functions in Education have not been fully developed.

Improve the ICT infrastructure for **HEIs** and create an innovative educational context. Reform educational practices to foster collaboration and learning motivation. Consider strategically and ethically how AI can bring real benefits to multiple teaching & learning activities.

THANK YOU
